PROFESSIONAL RIGGING & WORK AT HEIGHT CREW

Professional rigging, work at height and technical crew for major live productions and large-scale installations across Europe.

Europe · Festivals · Concerts · Live Productions · Art Installations

www.rigg.art

BUILT BY RIGGERS

A crew that already knows how to work together.

RIGG.ART was formed by a group of experienced freelance riggers and work-at-height specialists who have spent years working together on some of Europe's most demanding live productions.

A coordinated crew that already knows how to work together.

Several members of our crew have worked together for years on the Tomorrowland Mainstage, contributing to the rigging and installation of its complex scenic and decorative elements.

That shared experience, combined with years of work across major festivals, concerts, live productions and large-scale installations, brought the crew together under one name — and today we bring the same precision and teamwork to productions across Europe.

BUILT BY RIGGERS

TOMORROWLAND • MAINSTAGE • BELGIUM

Large-scale scenic installation and rigging

Members of our core crew have worked together on the Tomorrowland Mainstage for five consecutive years, from 2021 to 2026.

In 2026, 10 members of the crew worked together on the Mainstage, with the same working crew forming the core team over the last three years.

Our work has included the rigging and installation of complex scenic and decorative elements as part of the Mainstage production.

WHAT WE DO

Technical work. From planning to execution.

RIGG.ART provides experienced technical crew for demanding live productions, scenic installations and large-scale projects across Europe.

RIGGING

Professional rigging for structures, scenic elements, equipment and installations.

WORK AT HEIGHT

Safe and controlled execution of technical work at height.

STEEL STRUCTURES

Assembly and installation of steel structures and structural elements.

STAGE BUILD

Technical crew support for stage and production builds.

www.rigg.art

WHAT WE DO

MOTORS & HOISTS

Installation, rigging and use of motors and hoisting systems within project requirements.

TRUSS INSTALLATION

Assembly, rigging and installation of truss systems.

SCENIC & FESTIVAL INSTALLATIONS

Installation of scenic, decorative and architectural elements for festivals and live productions.

ART HANDLING & INSTALLATION

Professional handling, positioning and installation of large-scale artworks, sculptures and artistic installations.

Including work at height, rigging and specialist lifting operations where required.

www.rigg.art

WHAT WE DO

ROPE ACCESS

Rope-based access for technical installation and work at height.

RESCUE & SAFETY

Rescue capability and safety-focused technical execution.

TECHNICAL CREW SUPPORT

Experienced crew for installation, dismantling and on-site technical operations.
